Chief, Economic Research

20 March 1956

Chief, Industrial Division

Zurich Air Show, May 1956

25X1A9a

- Attached is a memorandum from of the Aircraft Branch, concerning tentative Soviet plans for participation in the Zurich Air Show.
- 2. You will note that the largest area of doubt relates to the display of the Badger and other large aircraft. Our greatest interest is, of course, in these.

25X1A9a

Force to take the initiative in getting qualified observers to the Air Show. It does not seem to me that this is our function. On the other hand, we have a very great interest in having a qualified view the aircraft if they are on display. It would seem to be a better part of valor to make preparations for or someone with background to go. If it is learne 25X1A5a1 later that the Soviets will not provide a static display of bombers or transports, these preparations could be cancelled.
